

CLAMPS

Stanley is world-renowned for manufacturing high-quality tools, a reputation that extends to its line of work-holding clamps. The company offers four different clamps and one cleverly designed portable vise. Each tool is designed to satisfy the demands of professional contractors, machinists, woodworkers and do-it-yourself homeowners.

Stanley's traditional-style MaxSteel® C-Clamp has a 2-inch capacity and advanced frame design that resists flexing and bending. Made of malleable iron and precision roll-formed threads, the clamp has an oversized T-handle for easy tightening. Each trigger clamp can be easily converted to a spreader for separating two parts.

The Stanley Spring Clamp has a 1-inch capacity and is fitted with 3 thick, soft-grip handles and injection-molded jaw pads that help to protect surfaces from dents and scratches.

Lastly, there's the super versatile MaxSteel® Multi-Angle Vise, which is a combination work-holding clamp and vise. It can be conveniently clamped onto a workbench, sawhorse, tailgate or similar object whenever and wherever you need a vise. The swivel-ball design allows you to rotate the vise into a comfortable position and the best possible working angle.

Today, Stanley continues to experiment with new clamp designs made of durable materials. The company uses a variety of materials to build its clamps, including cast iron, stamped metal, reinforced nylon, high-strength steel and cast aluminum. Many models have a corrosion-resistant finish that fights rust and provides a long, serviceable life.

CLAMPING TOOLS

FatMax Xtreme® Auto Trigger Clamp

- Rapid return spring mechanism - fastest one-handed bar clamp on the market
- 12" jaw capacity with 220 lbs. of clamping force
- Converts easily to a spreader
- Made from reinforced nylon for durability
- Removable jaw pads/oversized jaw face help protect surfaces from marring and damage

SKU #	TYPE	THROAT DEPTH		LENGTH		BOX QTY	CARTON QTY	UPC
		IN.	MM	IN.	MM			
83-124	Large	3-1/4	83	12	300	0	4	76174831245

FatMax® Trigger Clamp

- Drive mechanism provides three times faster travel and 50% more clamping force than competitive traditional products
- Quickly converts from a clamp to a spreader without the use of tools
- Smaller jaw can be positioned anywhere along bar for a range of applications
- Reinforced nylon and steel construction provides strength and durability
- Removable jaw pads help protect surfaces from marring and damage

MaxSteel® C Clamps

- Advanced frame design resists flexing and bending
- Roll-formed screw threads for smooth operation and durability
- Heavy-duty, malleable iron and steel construction
- Oversized "T" handle for applying torque
- High-visibility, corrosion-resistant finish

SKU #	THROAT DEPTH		CAPACITY		BOX QTY	CARTON QTY	UPC

83-032	1-5/16	33	2	50	4	24	76174830323

Metal Spring Clamp

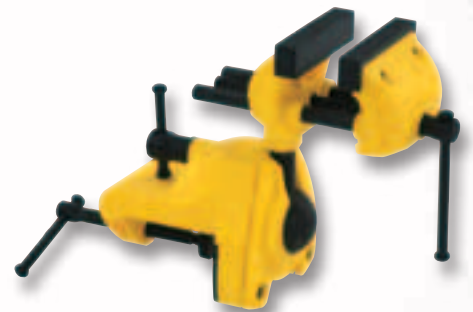

- Stamped metal construction provides strength
- Ergonomically designed handle pads fit securely and won't slip off
- Cold-formed spring for long life
- Injection-molded jaw pads help protect surfaces from marring and damage

SKU #	CAPACITY		BOX QTY	CARTON QTY	UPC
	IN.	MM			
83-079	1	25	4	24	76174830798

MaxSteel® Multi-Angle Vise

- Infinite and lockable positioning achieved with swivel-ball design
- Easily attached to most work surfaces with integral screw clamp
- Durable cast-aluminum and steel construction
- Removable jaw pads help protect surfaces from marring and damage
