Quality sheet steel

Tool carriages, chests, cabinets and various boxes for tool storage, as well as work benches, stands, hooks and other accessories are all made of quality sheet steel. Lacquer coated to resist corrosion and scratches, the equipment is practically indestructible.

Innovative design

A comprehensive knowledge of all the work requirements of local professionals has resulted in editions of workshop equipment able to offer great accessibility, clear tool storage and improved visibility at any moment.

Clear tool storage

With its clear tool storage and easy accessibility, Unior workshop equipment helps you keep your workshop in order and thereby increases your productivity.

Features of Unior's EuroPLUS tool carriage

Material:

- Perforated sheet metal
- Drawers with ball-bearing slides
- The syntetic covering protect drawers and tools from damage
- Locking system
- Protective closing mechanism of drawers
- Multi-purpose shelf
- ANTI-SHOCK rubbers
- Ecological lacquered with cadmium and lead free colour
- Wheels dia. 125 mm, for improved agility and stability

Dimensions:

Carriage: 810 x 510 x 945 mm
 Large drawer: 565 x 385 x 150 mm
 Small drawer: 565 x 365 x 70 mm

Capacity:

Drawer: 40 kg
 Static load capacity without wheels: 2000 kg

Pull-out shelf (290 x 350 mm) can be used to support documents or other items. When not needed it can be simply pushed back in. Load capacity is 10 kg.

10 kg

40 kg

Side walls have **waste basket**.

Carriage corners are strengthened by ANTI-SHOCK rubber protectors, protecting the carriage and the environment from damage.

New 400 mm **ball-bearing slides** are of higher quality compared to standard models. This means load capacity increased by 10%, while the drawer still runs smoothly and almost inaudibly. Drawers can be taken out easily – with a simple push of the plastic safety buttons.

Drawer closing mechanism prevents unwanted opening of drawers.

ANTI-SLIP covering offers damage protection for the drawer, as it prevents tools from sliding during opening and closing of the drawer.

Durable 125 mm diameter wheels with a safety brake enable mobility and stability, even if rolled fully loaded over a cable. Proper rolling stability is very useful especially on uneven workshop floors or in the yard.

Accessories

Paper holder

Paper holder, available in two versions, ensures that paper is always close at hand (**920 ES4A**, 619445).

Partitions

EuroPLUS carriage drawers can be divided freely into different sized parts by installing partitions (**920 ES3**, 617823).

Tool rack wall

A perforated sheet metal tool rack wall for hanging tools and other accessories can be attached to the **EuroPLUS** carriage (**920.1**, 619711).

Tool trays

Plastic (**965**) or **SOS*** (**964**) tool trays from polyethylene foam will keep your tools well ordered and protected from damage.

***SOS** = Safety

Modular work bench

The modular work bench is an indispensable piece of equipment in both professional and home workshops. It is used as a work surface and for safely storing tools large and small, as well as for temporarily laying aside tools and various materials. It is comprised of various modules that enable the composition of various forms of work bench, giving each user the possibility of creating an ideal layout with regard to both your needs and the instalment possibilities. Assembly is fast, simple and safe. A template is included to allow the precise drilling of holes. The components of the modular work bench are made of quality sheet metal up to 3 mm thick. The surface of the work bench's supporting structure is protected by powder paint, protecting the surface from both mechanical and atmospheric damage, as well as influences from the chemical environment. The counter is made of a massive composite panel allowing for rough work on its surface while, at the same time, it is protected with an environmentally-friendly coating. The counter is robust and hard-wearing and designed to take a heavy surface load.
